With Complete Success

The third annual transatlantic wireless telegraph tests conducted by the radio amateurs of this country have achieved a degree of success that was unexpected, according to the reports received from Europe. During the first three days of the tests 123 communications were made with low powered apparatus, and many complete messages transmitted. Among the latter was a message to Albert G. Jeffers, of the British American Tobacco Company in London, announcing the birth of a daughter in Richmond, Va.

For the first time in the annual tests messages from amateur transmitting stations in this country were received in France and Switzerland. The trials are considered extremely important because of their bearing upon the development of long distance low power transmitting apparatus and highly sensitive receiving equipment. The following is a complete list of the amateurs heard in England, France and Switzerland:
